Imbalance Detection Indicator in ICT for MT4 Download - Free - [TradingFinder]

The **Market Imbalance Detector** in MetaTrader 4 can identify Volume Imbalance (VI), Opening Gaps (OG), and Fair Value Gaps (FVG).

This **Supply and Demand indicator** displays bullish imbalances in green and bearish imbalances in red. Price imbalance represents a mismatch between supply and demand levels, indicating potential price targets.

Timeframe	Multi timeframe
Trading Style	Scalping - Day Trading
Market	Forex - Stocks - Commodities

Imbalance Detector in an Uptrend

According to the 1-hour price chart of **Gold (XAU/USD)**, the indicator first draws a Fair Value Gap (FVG) as a green box. The middle line of the box represents 50% of the "FVG" imbalance area.

When the price returns to this level, it provides a favorable condition for entering buy (Long) trades.

Imbalance Detector in a Downtrend

Similar to the uptrend, in the 5-minute price chart of **EUR/USD**, the gap between two non-adjacent candles is marked with a red box. The chart shows that the price has returned to 50% of the bearish "FVG" and then resumed the downtrend.
