

## Forex Position Size Calculator Tool + Formula

TradingFinder's Position Size Calculator determines the optimal **position size** (trading volume) for traders based on their available **capital**, **risk tolerance**, **stop loss** (in pips), and specified **symbol**. After entering the required parameters, click the "**Calculate**" button to see the output.

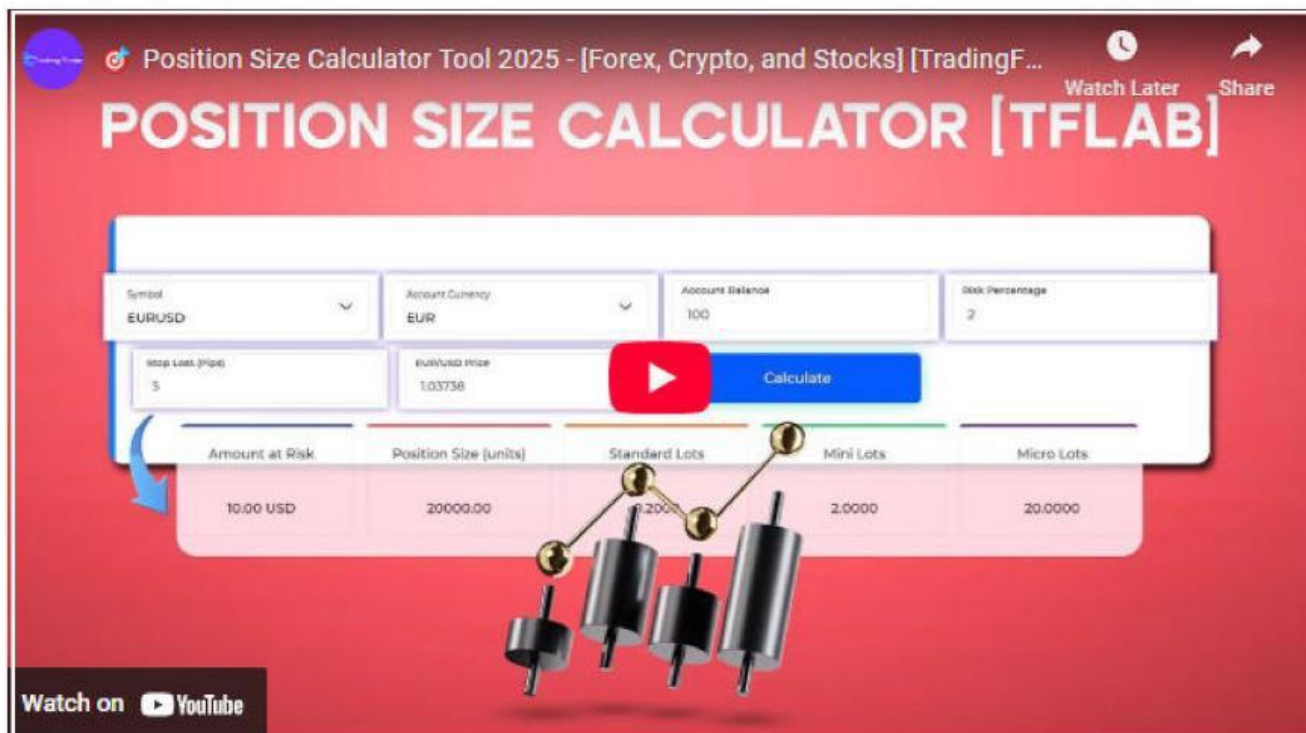

The screenshot shows a web-based calculator interface with the following fields and values:

- Symbol: EURUSD
- Account Currency: EUR
- Account Balance: 100
- Risk Percentage: 2
- Stop Loss (Pips): 5
- EUR/USD Price: 1.13905

At the bottom of the form is a button labeled "Calculate".

### What is the Position Size Calculator?

TradingFinder's Position Size Calculator serves as a **risk management** tool that recommends a trading position value based on the **input parameters**. This **free** tool is applicable in **forex**, **cryptocurrency**, and **stock** markets.

## Input Parameters for TradingFinder's Position Size Calculator

This calculator works with the following input values:

- ⚡ **Trading Symbol:** The currency pair or asset intended for trading;
- ⚡ **Account Currency:** The base currency in the trader's account;
- ⚡ **Account Balance:** The available capital in the trader's account;
- ⚡ **Risk Percentage:** The trader's risk tolerance;
- ⚡ **Stop Loss:** The difference between entry price and Stop Loss level in pips;
- ⚡ **Currency Conversion Rate.**

Input Parameters

The described parameters for TradingFinder's Position Size Calculator are shown in the image above

The last value can be set either **automatically** (based on market data) or **manually**.

## How Outputs are Calculated in the Position Size Calculator

The tool's outputs are calculated as follows:

- ⚡ **Risk Amount** = (Account Balance × Risk Percentage)/100

⚡ **Position Size** = (Risk Amount)/(Stop Loss × Pip Value)

⚡ **Standard Lots** = Position Size/100000

⚡ **Mini Lots** = Position Size/10000

⚡ **Micro Lots** = Position Size/1000

Amount at Risk	Position Size (units)	Standard Lots	Mini Lots	Micro Lots
10.00 USD	20000.00	0.2000	2.0000	20.0000

After clicking the "Calculate" option, the output of TradingFinder's Position Size Calculator appears in the section shown in the image

## Application of TradingFinder's Position Size Calculator

The core function of this service is **risk management** through determining an appropriate volume for trading. More specifically, when a trader enters the **specified amount** provided by this tool **or less** in their **trade**, they will not exceed their **risk tolerance** level.

Additionally, TradingFinder's Position Size Calculator helps traders gain better **control** over their **emotions** by establishing a specific trading amount, leading to more precise results.
