

In the past, people used a \_\_\_\_\_ to travel from place to place. These journeys were often long and \_\_\_\_\_, and only rich people could travel this way. Later, the invention of the \_\_\_\_\_ **vehicle** changed everything. Every day, millions of people \_\_\_\_\_ to work by products of the automotive industry.

Early cars were simple, but many people now want to have them and those \_\_\_\_\_ **cars** are popular once again. These vehicles did not have modern features like \_\_\_\_\_ **assist** or \_\_\_\_\_ systems. Today's vehicles are much more \_\_\_\_\_. They have advanced technology that helps the driver. For example, if you are \_\_\_\_\_ **of your lane**, the car will warn you. Some cars can even stop if they \_\_\_\_\_ danger.

We now use a \_\_\_\_\_ instead of a metal key to unlock and start our cars. Many people \_\_\_\_\_ electric cars at home instead of going to petrol stations. These changes make our life easier and better for the environment. Modern cars have a lot of variations and \_\_\_\_\_ to make them meet the needs of each customer.

People used to **be** \_\_\_\_\_ cars because of their speed or look. Some even performed **a** \_\_\_\_\_ to show off. Now, safety and comfort are more important.

Also, people often \_\_\_\_\_ their screens while driving, which can be dangerous.

Although some people still love classic cars, many prefer modern ones for their daily commute. In the end, cars have changed a lot, but they still help us move from one place to another.
