Read the following passage about wildlife conservation and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Wildlife conservation is a crucial endeavor that aims to protect animal species and ***their*** habitats. This effort is essential for maintaining biodiversity and ensuring the health of our ecosystems. Human activities such as deforestation, pollution, and climate change are some of the primary threats to wildlife. Conservation initiatives strive to mitigate these impacts through various strategies.

One significant aspect of wildlife conservation is the ***establishment*** of protected areas. National parks, wildlife reserves, and marine protected areas are created to provide safe havens for endangered species. These areas not only protect wildlife but also offer opportunities for scientific research and eco-tourism, which can benefit local economies.

Another important approach is the reintroduction of species into their natural habitats. This method has been successful in bringing several species back from the brink of extinction. Conservationists carefully monitor and support these reintroduced populations to ensure their survival.

Education and awareness campaigns play a ***pivotal*** role in wildlife conservation as well. By educating the public about the importance of biodiversity and the threats facing wildlife, these campaigns foster a sense of responsibility and encourage community involvement in conservation efforts.

Technological advancements are also aiding conservation efforts. Innovations such as satellite tracking, DNA analysis, and drone surveillance help researchers gather critical data and monitor wildlife populations more effectively. These tools enable more informed decision-making and efficient conservation strategies.

Question 23. Which of the following is NOT mentioned as a threat to wildlife?
A. Deforestation **B.** Pollution **C.** Climate change **D.** Urbanization

Question 24. The word "***establishment***" in paragraph 2 is closest in meaning to:

Read the following passage about wildlife conservation and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] Wildlife conservation refers to the efforts made to protect and preserve wild animal species and their habitats. [II] It is crucial for maintaining biodiversity, which plays a vital role in ecosystem stability and health (Smith & Jones, 2018). [III] Unfortunately, many species are threatened due to habitat destruction, poaching, and climate change, making conservation efforts more urgent than ever. [IV]

One of the primary reasons for wildlife conservation is the preservation of biodiversity. A diverse range of species contributes to ecosystem services, such as pollination, water purification, and climate regulation. The loss of a single species can disrupt these services and lead to ecological imbalances. For instance, the decline of pollinators like bees has serious implications for food production and agriculture (Global Biodiversity Outlook, 2020).

Moreover, wildlife conservation has significant economic benefits. Many communities depend on ecotourism, which relies on healthy wildlife populations and intact ecosystems. According to a study by the World Wildlife Fund (WWF), ecotourism can generate billions of dollars in revenue, providing jobs and supporting local economies (WWF, 2021). Protecting wildlife not only safeguards natural resources but also creates sustainable livelihoods for local populations.

However, effective wildlife conservation requires a ***collaborative*** approach. Governments, non-governmental organizations, and local communities must work together to implement policies and strategies that promote conservation efforts. Community-based conservation initiatives, where local people actively participate in protecting ***their*** natural resources, have shown promising results. These initiatives empower communities and ensure that conservation efforts are tailored to local needs and contexts (Bennett & Dearden, 2014).
