Abstract **Background:** The purpose of this study was to determine the prevalence of self-reported mental health problems in a sample of young adults in the United Kingdom. **Methods:** A self-report questionnaire was distributed to 1,000 young adults (18–24 years) in the United Kingdom. The questionnaire included questions about mental health problems, including depression, anxiety, and stress. **Results:** The prevalence of self-reported mental health problems was 15.5%. The most common mental health problems were depression (10.5%), anxiety (10.5%), and stress (10.5%). **Conclusions:** The prevalence of self-reported mental health problems in young adults in the United Kingdom is 15.5%. The most common mental health problems are depression, anxiety, and stress.
