Perfect Trendline Indicator for MT4 Download - Free - [Trading Finder]

The **Perfect Trendline** indicator displays the trend's direction using two moving average lines **(MA)** with periods of 3 and 7.

When the **red line (fast moving average)** is above the **green line (slow moving average)**, the trend is considered **bullish**, and candles are marked with **green histograms**.

Conversely, the red line below the**green line** indicates a **bearish** trend and red histograms are formed. This trading tool is widely used and also falls under the category of **MT4 signal and forecast indicators**, making it essential for traders

Market	All Markets

LIVEWORKSHEETS

Bullish Trend Conditions

As shown in the example below, a green dot appears after the red line breaks the green line, indicating a potential trend reversal.

Following this, the **fast moving average (green line)** moves above the **slow moving average (red line)**, and the consecutive green histograms form, indicating the trend is **bullish**.

Bearish Trend Conditions

According to the 1-hour chart of the **AUD/USD** currency pair, the appearance of a **red dot** indicates the intersection of the moving averages and the trend reversal.

Additionally, the **fast moving average (red line)** movement below the **green** line and the marking of candles with **red histograms** indicate a **bearish** trend.
