**What is TradingFinder's Profit/Loss Calculator?**

TradingFinder's Profit Calculator enables precise calculation of **profit** or **loss** in **2** directions [**Buy**, **Sell**] before entering a **trade** in the global **Forex** market.

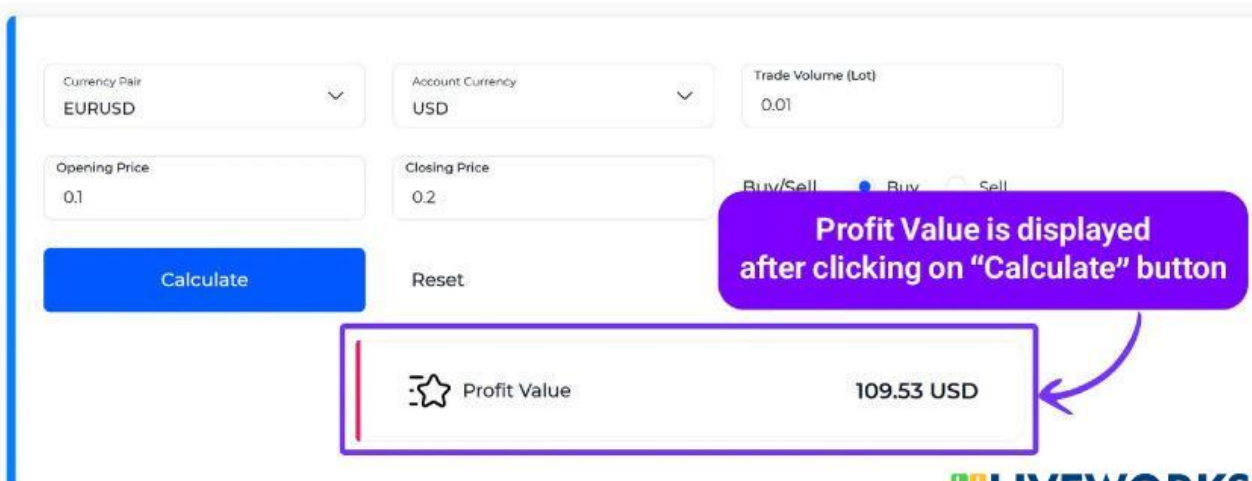

This way, traders can plan their trades and, if needed, **modify** their order size to **increase profits** or **reduce losses**.

## Guide to Using the Forex Profit/Loss Calculator Tool

Follow these steps to utilize the Forex calculator tool:

1. Select the currency pair for your trading position;
2. Choose your account base currency from among **20+** listed options;
3. Enter the trade volume in lots. To calculate the amount of money you can use the **TradingFinder Position size calculator tool**;
4. Specify the **"Opening Price"** (price at trade entry) and **"Closing Price"** (price at position exit);
5. Select the trade direction (buy or sell);
6. Click on the **"Calculate"** button to display the final profit/loss amount.

The "**Reset**" option clears all calculator fields.

## How the Profit Calculator Works

This service calculates the result for users through the following formula:

**Profit** = (Closing Price - Opening Price) × Trade Size × Pip Value

The pip value is calculated as follows:

**Pip Value** = (Pip Size)/(Currency Pair Value) × Lot Size

## Why Should We Use This Tool?

TradingFinder's Profit Calculator helps **increase speed** in the trade planning by predicting potential profit or loss from trades.

This service can also be used for **setting TP/SLs** (Take Profit/Stop Loss) in positions. Additionally, Forex traders can use this tool to **calculate the risk-reward ratio** for a trade.
