LIVEWORKSHEETS

## Overview

The **Better DMX Jurik Histogram** simplifies data interpretation and serves as an effective tool for detecting **price movement directions**. By reducing noise and lag, the DMX oscillator provides more accurate signals for identifying the **direction and strength of market trends**. This indicator oscillates within specific ranges and highlights **overbought** and **oversold levels**, with values **above +60 indicating overbought** conditions and **below -60 indicating oversold** conditions.

## Bullish Trend

The image below demonstrates the **USD/CAD pair on the H4 timeframe**. When the **blue line crosses above the orange line**, traders interpret it as a **buy signal**.

The blue line crossing above the orange line acts as a buy signal in the Better DMX Jurik Histogram Oscillator

## Bearish Trend

The **GBP/CHF pair on the H1 timeframe** showcases the indicator's performance in a **bearish trend**.

After forming histogram bars in the positive phase (above zero), if the **blue line crosses below the red line**, traders can interpret this as a **sell signal**.

LIVEWORKSHEETS

The blue line crossing below the red line indicates a sell signal in the Better DMX Jurik Histogram Oscillator
