TradingView MetaTrader4 MetaTrader5

LIVEWORKSHEETS

The Trade Assist TF is one of **Trading Finder Products** designed for **capital management** and **risk control** in MetaTrader 4.

This expert advisor provides a **practical panel** offering trade **and capital management, setting the breakeven point, and utilizing the Trailing Stop function.**

Specifications of the Trade Assistant Expert

The table below outlines the details and specifications of the Trade Assistant Expert:

Sell Trades Using the Expert

In the hourly chart of **AUDJPY (Australian Dollar/Japanese Yen)**, a sell trade has been executed using the **Trade Assistant Expert**.

This **expert** allows traders to **manage** their trades easily, place pending orders, and use advanced **risk management** features for better optimization.

With this tool, traders can **shift profitable** trades to **Break Even**, adjust the **breakeven point**, and utilize Partial Close and **Trailing Stop** to protect their profits, preventing profit reduction or unnecessary **stop loss** activation.
