Order Blocks & Breaker Blocks Signals + Alerts Indicator for TradingView

The **OB & BB Signals + Alerts Indicator** is a hybrid tool designed to identify and plot **Order Blocks (OB)** and **Breaker Blocks (BB)**.

These areas are crucial reversal zones based on **Smart Money Concepts (SMC)** and **ICT strategies**, acting as significant **supply** and **demand** zones for price reversal and continuation.

LIVEWORKSHEETS

OB & BB Signals + Alerts Indicator Specifications

Category	ICT - Liquidity - Smart Money
Platform	TradingView
Skill Level	Advanced
Indicator Type	Reversal - Continuation
Timeframe	Multi timeframe
Trading Style	Intraday
Market	All Markets

LIVEWORKSHEETS

Bullish Trend Conditions

In the **GBP/USD** 1-hour chart example, a **supply order block (red box)** is broken by price and transformed into a **demand breaker block**.

The price returns to this area in a corrective move and resumes the **bullish trend**.

Analysis of Supply Order Block and Demand Breaker Block

Bearish Trend Conditions

The figure below shows that the price breaks through a **Demand Order Block (green box)** and turns it into a **Supply Breaker Block (yellow box)**.

The return of price to the **Supply Breaker Block** creates an excellent opportunity for entering **sell trades** as the price resumes its **bearish trend** after testing the zone.
