- D. The price of modern robots

**PART 2. Read the following passage about new ways to learn and mark the letter A, B, C, D on your answer sheet to indicate the best answer to each of the following questions from 25 to 29. (1.0 point) 100-120 words**

### **International Robot Show**

Welcome to the International Robot Show! Here, you'll see the latest and most amazing robots. Today, there are many types of robots. Home robots help with chores like washing dishes, ironing clothes, and watering plants. Teacher robots can teach different subjects. Worker robots are strong and lift heavy things, while space robots assist scientists in space. Doctor robots can help with medical tasks and even diagnose diseases. Some people feel more comfortable talking to them about health. At the show, you can choose your favorite

robot. Think about its height, weight, and price. Remember, robots are useful but have no feelings and can break like any other machine.

**(TH) Question 25. What is the main purpose of the International Robot Show?**

- A. To sell different kinds of robots
- B. To help people learn how to fix robots
- C. To show the latest types of robots
- D. To teach children how to build robots

**(NB) Question 26. What can home robots do?**

- A. Drive cars
- B. Help with housework
- C. Study different subjects
- D. Fix other robots

**(NB) Question 27. What do teacher robots do?**

- A. Wash dishes
- B. Water plants
- C. Teach subjects
- D. Diagnose illnesses

**(NB) Question 28. Which robots help scientists in space?**

- A. Worker robots
- B. Space robots
- C. Doctor robots
- D. Home robots

**(TH) Question 29. According to the passage, which of the following is TRUE?**

- A. Robots have emotions like people.
- B. People never use robots at home.
- C. Robots are strong and cannot be broken.
- D. Robots are helpful but can be damaged.

**PART 3. Read the following passage about Robots and mark the letter A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks from 30 to 33. (0.8 point)**

Robots are no longer just science fiction—they are real and already improving how we live. (30) \_\_\_\_\_, they are used in hospitals, schools, and homes. Their ability to learn and work with people is developing quickly.

In Japan, engineers built a robot named “SmileBot.” (31) \_\_\_\_\_, it can recognize emotions by scanning people’s faces and respond with friendly gestures.

Today, we can find different kinds of robots in daily life. Some cook simple meals or clean windows. (32) \_\_\_\_\_, others help students with homework or tell bedtime stories.

Experts say future robots will be more advanced and support people not only with work but also with (33) \_\_\_\_\_ in their daily lives.
