

# Teamwork

## Task 1

What are some of the problems that could come up when working with a team?

Do you like working in a group or do you prefer working alone? Why?

Do you think knowing how to collaborate with others is a useful skill in life? Why?

## Main Task

In groups, discuss and brainstorm answers to the two questions below.

1. What are some real problems in your community or school that a group of students could help solve?
2. What could a team of students do to solve one of those problems? Use teamwork language in your ideas:
  - "Why don't we..."
  - "How about..."
  - "We could..."
