

Landscapes in Temperate and Cold Zones

1. Choose the correct answer (Multiple choice):

1. What type of forest is typical in the Mediterranean landscape?

- a) Taiga
- b) Deciduous forest
- c) Mediterranean forest
- d) Tundra

2. What vegetation is common in the coldest areas of the continental landscape?

- a) Steppe
- b) Taiga
- c) Moorland
- d) Mediterranean forest

3. What landscape is found in the Arctic and Antarctic?

- a) Mountain landscape
- b) Oceanic landscape
- c) Polar landscape
- d) Continental landscape

2. Match the landscape with its description.

Oceanic	Mountain	Polar	Mediterranean	Continental
---------	----------	-------	---------------	-------------

- Evergreen trees like pines and holm oaks.
- Deciduous forests and abundant vegetation.
- Grasslands, taiga, and steppe.
- Tundra, mosses, and lichens.
- Shrubs, meadows, and permanent snow at the top.

3. Fill in the gaps:

a) In the _____ landscape, we find moorland and deciduous forests.

b) The coldest forests are called _____, and they are made up of evergreen trees like firs and pines.

c) In the _____ landscape, vegetation changes with altitude, and you can find permanent snow at the top.

4. Classify into Temperate Zone or Cold Zone

Mediterranean	Continental	Polar	Oceanic	Mountain
---------------	-------------	-------	---------	----------

<u>Temperate zone</u>	<u>Cold Zone</u>
