## Question 01 - Read and number circle true or false.

### ANTS

They live in colonies. There are different kinds of ants in a colony. The queen ants lay the eggs. The ants feed and protect the queen. Ants can communicate through chemicals. When a worker ant finds food, it usually emits a chemical trail. Other worker ants smell the chemical and can find the food. Queen ants live longer than worker ants.

- |   |               |
|---|---------------|
| 1. There are not different kinds of ants in a colony. | TRUE / FALSE. |
| 2. The Queen ants lay the eggs.                       | TRUE / FALSE. |
