- 10 I have many hobbies and **all** / **all of** them are creative.

___/10

Reading

Body language

Terry Gibbs, a body language expert, explains how body language helps communication.

People move their face and body in different ways, which can show their emotions. Body language is non-verbal. This means that people are communicating information without speaking. A study showed that effective communication is 93% non-verbal and only 7% the words you say. Of the 93%, 38% is the tone of your voice and 55% is body language. So, to communicate well you need to understand body language.

I work for people interested in understanding the signals that individuals send. A newspaper will contact me when they want to look into the non-verbal messages that politicians give when they speak on television. Sometimes the words give one message, but the body language says the opposite. I also advise the police when they don't know if a criminal is telling the truth or if a witness is unreliable. Of course, when I'm sitting in the police interview room, I don't reveal to the witnesses that I'm a body language expert.

For example, a person who is shy doesn't like looking directly in the eye of another person. They often look down, keeping their arms close to their body and their legs together. However, a confident person can maintain eye contact for a long time and will open their arms and shoulders wide to appear bigger. They also walk faster but, when speaking, they often pause and are happy to listen, whereas nervous people can't stop talking.

Most of the time, I can tell if a criminal is lying. I notice if their attitude changes when we are talking. For example, they might start being friendly and then become more serious as I ask them for more details. And people who give lots of unnecessary details also might be trying too hard to make me believe something. If they touch their face with their hand or put their hand over their mouth, these are good signs that their story might not be true.

To read body language, you must be interested in people and learn the meaning of many different body movements and facial expressions. There is plenty of free information about reading body language on my website, or my e-book on the subject is now available to buy.

5 Read the text quickly and answer the questions.

- | | |
|--|--|
| <p>1 The text is about</p> <p>A an expert on sign language for deaf people.
B an expert on non-verbal signals.</p> <p>2 The expert helps</p> <p>A politicians. B the police.</p> <p>3 When deciding if a criminal is telling the truth, the expert looks at the movement of their</p> <p>A hands. B face and mouth.</p> | <p>4 The expert compares</p> <p>A friendly and serious people.
