

Tommy's Solar House - Grade 4 (Level A2)

Tommy was excited. Today was the school's annual Science Fair. He had worked on his project about solar energy for weeks. He built a small model house powered by a solar panel. As the judges walked by, Tommy explained how sunlight was turned into electricity. One of the judges smiled and said, 'This is very impressive, Tommy.' At the end of the day, Tommy won second place, but he was already planning an even better project for next year.

Questions:
