**Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.**

Energy is the fundamental force that powers our world and shapes our daily lives. It fuels our homes, transportation, and industries, making the modern conveniences we rely on possible. Without a steady supply of energy, our societies would come to a halt.

Energy comes in many forms - from the electricity that lights up our homes to the fuel that propels our vehicles. Each type of energy has unique properties and applications. Renewable sources like solar, wind, and hydro are becoming increasingly important as we seek to reduce our environmental impact and build a more **sustainable** future.

Conserving energy is crucial for protecting our planet. By using energy more efficiently and tapping into renewable sources, we can help mitigate climate change and preserve natural resources for generations to come. Understanding energy is not just about keeping the lights on - it's about securing a better tomorrow.

As the global demand for energy continues to grow, the need to develop innovative, eco-friendly solutions becomes ever more pressing. The choices we make today about how we produce and consume energy will have profound implications for the future of our world.

**Question 31.** What is the main purpose of energy?
A. To power our entertainment devices.
B. To fuel our daily lives and activities.
C. To heat and cool our homes.
D. To reduce our environmental impact.

**Question 32.** The word **sustainable** in the passage is OPPOSITE in meaning to _____.
A. renewable B. eco-friendly C. decreasing D. efficient

**Question 33.** What is the main benefit of renewable energy sources?
A. They are more affordable. B. They are easier to produce.
C. They are sustainable and eco-friendly. D. They provide more energy.

**Question 34.** Why is conserving energy important?
A. To save money on utility bills.
B. To reduce our carbon footprint and protect the environment.
C. To increase the overall energy supply for a better tomorrow.
D. To power more devices in our homes.

**Question 35.** What is the main reason for understanding energy?
A. To maximise our energy consumption.
B. To reduce our reliance on fossil fuels.
C. To meet the increasing demand for power.
D. To make more informed choices about energy use.

**Question 36.** Which of the following is NOT true according to the passage?
A. Renewable energy sources have no impact on climate change.
B. Energy powers our homes, transportation, and industries.
C. Conserving energy is important for protecting the environment.
D. The demand for energy is increasing globally.

**Four phrases/ sentences have been removed from the text below. For each question, mark the letter A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks from 37 to 40.**

Protecting the environment is important for everyone, and there are many simple ways we can help. First, we can reduce waste by recycling and reusing materials. (**37**) _____. Another way to protect the environment is to use less energy. We can turn off lights and unplug devices (**38**) _____. Using energy efficient appliances also helps save electricity. Additionally, we can choose to walk, bike, or use public transport instead of driving a car. (**39**) _____. Planting trees is another great way to help the environment. Trees absorb carbon dioxide and provide oxygen, making the air fresher.

LIVEWORKSHEETS
