PART 2. For each question, choose the correct answer. The young people below all want to watch a documentary series about the natural world. Decide which series would be most suitable for the people below.

Nature documentary series

A Watch Nature

The Watch Nature team spent two years filming in and around the African rainforest. Presented by famous biology expert Magnus Green, the series focuses as much on people's influence on the wildlife as on the lives of the creatures themselves. Several of the animals appear for the first time on film.

C Nature Planet

With an amazing soundtrack provided by famous guitarist Stella Murray, Nature Planet focuses on species that live in the driest places on Earth and whose numbers are so low they're in danger of disappearing altogether. It includes information on what we can all do to care more for the natural world.

E Fragile Earth

With a focus on how people and climate change are affecting nature worldwide, this series is not only beautiful to look at, but sounds great too, with music provided by the world-famous Capital Orchestra. It shows the damage humans are doing but also suggests solutions.

G Channel Nature

This wonderful series shows how several major landscapes were created. With beautiful music provided by well-known singers George and Hans Severin, we follow the lives of animals that make their homes on shores around the world. Several programmes look at how the wildlife of the Antarctic survives the freezing temperatures there.

B Wild World

There's film of some unusual sea creatures in this fantastic series. Some of the species are shown for the first time on film. There are amazing pictures of extremely rare sharks swimming under ice near Greenland. The series was filmed in all of the world's oceans.

D Our Planet

From the driest desert to the deepest ocean, this series has everything. Recorded in over fifty countries, Our Planet explains how the geography of each region ended up being so different, as well as showing us the lives of the animals living there. The two programmes about life in the world's highest peaks are not to be missed.

F Third Planet from the Sun

You're sure to have seen Dr. Joyce Angel on TV before. In this series, the university physics professor explains why weather, more than anything else, influences what lives in each region. See how creatures in the world's oceans and mountain ranges are affected by small changes in temperature.

H Earth Central

Filmed on all seven of the world's continents, Earth Central is science researcher and presenter Larry Halliwell's latest series. We follow a family of monkeys in the jungle in one of the episodes, and discover how animals that live on beaches are affected by large numbers of people using them during the summer in another.

Li is doing a project on rare animals and would like to see a series that includes information about them. She loves learning about deserts and would also like advice about helping the environment.

Edwin is keen to know more about animals that live in cold places. He'd like to find out about what lives on beaches and coasts, and he likes programmes with soundtracks by famous musicians.

Ulrika likes learning about nature in mountain ranges and would prefer to see a series that was filmed around the world. She wants to know how different landscapes were formed.

Marco would love to find out how humans are affecting wildlife. He'd like the series to show life in jungles, including species that no one has filmed before.

Stacey is looking for a series that's presented by a famous scientist. She enjoys seeing animals that live in the sea and wants to find out how climate affects animals that live in different places.
