Sustainable Development Goals

NEWS REPORT

Promoting SDGs in Secondary School

Reporter: Good morning! Today, we are at Rock High School, where students and teachers come together to make a difference in our world. This year, the school has decided to focus on the United Nations' Sustainable Development Goals (SDGs).

Ms Williams(Headmaster): "We believe that it is important for our students to understand the challenges facing our planet. By incorporating the SDGs into our curriculum, we hope to inspire them to take action."

Reporter: In the classroom, students are learning about goals such as clean water and sanitation, quality education, and climate action. They are discussing how they can contribute to these goals through projects and activities.

Lily (student): "We are planting trees to help the environment and make our school greener. It feels good to know we are doing something positive." **Kyle (student)**: "We are also organizing a recycling program to reduce waste. It's important to take care of our planet." **Chloe (student)**: "I think the goal of quality education is really important. Everyone deserves a chance to learn and grow, no matter where they come from." **Ethan (student)**: "Absolutely! I feel that the SDGs make us more conscious of global issues, like poverty and inequality. It's our responsibility to help others and make a change."

Mr Robinson (teacher): "We are encouraging students to think critically about sustainability. Each project connects to one of the SDGs, making learning both fun and meaningful.

Reporter: Rock High School is setting a great example for other schools. By focusing on the Sustainable Development Goals, they are preparing the next generation to create a better and more sustainable future for everyone.That's all for today's news! Remember, every small action counts. Let's all do our part to support the SDGs!

LIVEWORKSHEETS
