

How to be safe in an earthquake

Stay inside. Get under a strong table or desk and hold onto the furniture. Stay away from windows and mirrors because they might break. Stay away from bookshelves too. They might fall on you. If you are in bed, stay there and put a pillow over your head. Do not run outside. A building might fall on you. If you're in a car, drive away from buildings, bridges and trees and stay in your car. Wait until the end of the earthquake before you leave your car.

What to do if you get lost in a forest

First, stay calm, stay in one place and make a plan. A plan will help you to feel better. Build a simple shelter and make a fire so you can get warm and feel safer as well. Also remember that water is the most important thing, so look for water, but don't move far away from your starting place or you might get more lost. And don't be surprised about the mobile – in a forest a mobile often won't work because there's no signal.
