6. How **many** / **much** research have you done into animal behaviour?

3 Read the paragraph and then complete the sentences below, writing one word from the paragraph in each gap.

Paragraph:

The giant panda, with its distinctive black and white markings, is one of the world's most famous and easily recognised animals. Unfortunately, it is also one of the most endangered. The giant panda is native to the bamboo forests of central and south-western China, and its diet is composed nearly exclusively of bamboo. It is a large, gentle animal, and even in the wild it has almost no predators. However, it is facing near-extinction because the size of its natural habitat has decreased greatly. This is because huge sections of China's bamboo forest have been cut down and converted to farmland. Although many giant pandas now live in captivity – in zoos and wildlife research centres – scientists have had problems encouraging them to breed in these places. As a result, population figures for giant pandas are still very low.

Complete the sentences:

1. The giant panda is one of the most _____ animals in the world.
2. Giant pandas eat _____ almost exclusively.
3. They are gentle animals with almost no _____ in the wild.
4. The panda's natural _____ is getting smaller.
5. It is difficult for giant pandas to _____ in zoos.
