

## Examen Geometría II

1. Completa el siguiente dibujo.

2. Clasifica los siguientes polígonos.

3. Clasifica las siguientes figuras en el grupo correcto.

| Clasificación de los triángulos según sus ángulos |             |            |
|---|-------------|------------|
| Acutángulo  | Obtusángulo | Rectángulo |
|   |             |            |

## Clasificación de los triángulos según sus lados

Isósceles

Equilátero

Escaleno

## Clasificación de los cuadriláteros paralelogramos

Cuadrado

Rombo

Rectángulo

Romboide

## Clasificación de los cuadriláteros no paralelogramos

Trapecio

Trapezoide

**4. Completa la siguiente tabla.**

| Dibujo  | Nombre | Regu / Irre | Lados | Vértices | Ángulos |
|---|--------|-------------|-------|----------|---------|
|    |        |             |       |          |         |
|    |        |             |       |          |         |
|    |        |             |       |          |         |
|   |        |             |       |          |         |
|  |        |             |       |          |         |
|  |        |             |       |          |         |
|  |        |             |       |          |         |
|  |        |             |       |          |         |

**5. Completa el siguiente dibujo.**
