

My name is Abbey. I study the ocean. I usually work from Mondays to Fridays in an office. I often work on Saturdays and Sundays too. But sometimes, I work on a boat, out on the sea, near the country Belize. Work on the boat is difficult, but it's fun. I always find new and amazing animals. They're my co-workers and we work together in a really beautiful place, the ocean!

Jeff: My name is Jeff. I'm a scientist. I work in a lab and I study tiny animals from the ocean. Usually, I work about five days a week, on both weekdays and weekends. In the morning, I often read emails and reports by other scientists. Sometimes, I write reports, too. In the afternoon, I usually work in the lab. My days in the lab are never the same. Every day is new and exciting!
