

THE MOST DANGEROUS ANIMALS IN NICARAGUA

Reading Comprehension Activity

Read the text and answer

Nicaragua is one of the most beautiful countries in Central America, but it is also home to some of the most dangerous creatures in the region.

The most poisonous snake in Nicaragua is the fer-de-lance. Its bite is one of the most painful and can be fatal if not treated quickly. This snake lives deep in the jungle and is often hard to see because it hides in the leaves.

One of the most aggressive animals in the water is the bull shark. It is the only shark that can live in both salt and fresh water. In Nicaragua, it is sometimes seen in the San Juan River. Bull sharks are among the strongest swimmers and have caused more attacks in rivers than other shark species.

The American crocodile is the largest reptile in the country. It can grow up to 5 meters long and is one of the most dangerous river animals. These crocodiles are fast and powerful.

Although not deadly, the botfly is one of the most disgusting insects in the forest. It lays its eggs under the skin, causing some of the most painful infections.

When visiting Nicaragua's amazing nature, be cautious! Even the most beautiful places can hide the most dangerous creatures.
