Class:

Magnetism and Its Applications in Everyday Life

Stimulation

Have you ever engaged with magnets before? What occurs when a magnet is brought near various objects in your surroundings? Now, take a look at the following images! Image 1 depicts a magnet attracting a paper clip, image 2 shows a magnet attracting a coin, image 3 illustrates a magnet attracting a nail, and image 4 features a magnet on a refrigerator door. Why do you believe these objects can be drawn to magnets? Can every object be attracted to magnets? Let's explore this together!
