Simplified SAP S/4HANA Procurement Training

Unit 1: SAP Fiori User Experience

SAP Fiori is a user-friendly way to use SAP. It's designed to work on different devices and is simple to use.

Key Points:

- Role-based: Users only see what they need.
- Responsive: Works well on phones, tablets, and desktops.
- Coherent: All apps look and feel the same.
- Simple: Focused on tasks, not cluttered.
- Delightful: A smooth, easy-to-use experience.

Types of Fiori Apps:

- Transactional: For doing tasks like creating orders.
- Analytical: For viewing reports and insights.
- Fact Sheets: For showing key details about an item.

The SAP Fiori Launchpad is like your home screen. You see your apps in tiles. You can customize how it looks and set your preferences.

There's also a help function with guided tours and tooltips to explain parts of the app.
