

# Listening Practice 2.2

Listen carefully to the audio recording. You will hear a monologue related to a real-life pharmaceutical context. After listening, answer all 7 multiple-choice questions (MCQs) based on what you heard.

1. What condition does Mr. Harun have that requires dosage adjustment?

A. Hypertension

B. Liver cirrhosis

C. Renal impairment  
(eGFR 25 mL/min)

2. What antibiotic is being prescribed to Mr. Harun?

A. Amoxicillin

B. Levofloxacin

C. Azithromycin

3. What is the correct adjusted dosage schedule for levofloxacin in this case?

A. 500 mg daily  
throughout

B. 250 mg twice daily

C. 500 mg once on day one,  
then 250 mg every 48 hours

4. What co-existing medication increases Mr. Harun's risk of lactic acidosis?

A. Metformin

B. Omeprazole

C. Aspirin

5. What side effect is the doctor particularly concerned about due to levofloxacin's class?

A. Liver enzyme  
elevation

B. QT interval  
prolongation

C. Weight gain

6. What interaction concern does the doctor raise regarding calcium supplements?

A. It increases the risk of  
bleeding

B. It reduces the  
absorption of levofloxacin

C. It causes kidney stones

7. What special instruction does the doctor give concerning patient communication?

A. Give instructions  
only in English

B. Write instructions in  
small print

C. Ensure instructions are  
explained clearly in Malay
