

# Listening Practice 2.2

Listen carefully to the audio recording. You will hear a monologue related to a real-life pharmaceutical context. After listening, answer all 7 multiple-choice questions (MCQs) based on what you heard.

1. What condition does Mr. Harun have that requires dosage adjustment?

A. Hypertension

B. Liver cirrhosis

C. Renal impairment  
(eGFR 25 mL/min)

2. What antibiotic is being prescribed to Mr. Harun?

A. Amoxicillin

B. Levofloxacin

C. Azithromycin

3. What is the correct adjusted dosage schedule for levofloxacin in this case?

A. 500 mg daily throughout

B. 250 mg twice daily

C. 500 mg once on day one, then 250 mg every 48 hours

4. What co-existing medication increases Mr. Harun's risk of lactic acidosis?

A. Metformin

B. Omeprazole

C. Aspirin

5. What side effect is the doctor particularly concerned about due to levofloxacin's class?

A. Liver enzyme elevation

B. QT interval prolongation

C. Weight gain

6. What interaction concern does the doctor raise regarding calcium supplements?

A. It increases the risk of bleeding

B. It reduces the absorption of levofloxacin

C. It causes kidney stones

7. What special instruction does the doctor give concerning patient communication?

A. Give instructions only in English

B. Write instructions in small print

C. Ensure instructions are explained clearly in Malay
