

## INSIDE THE BODY

# THE RESPIRATORY SYSTEM

First, the \_\_\_\_\_ enters the body through the \_\_\_\_\_ or the mouth. Then, the air goes down a tube called the \_\_\_\_\_. At the end of the trachea, there are two tubes called the \_\_\_\_\_. The air enters the lungs and the \_\_\_\_\_ absorbs the oxygen and transports it around the body. Finally, the \_\_\_\_\_ comes out of our body through the nose or mouth.

The process starts \_\_\_\_\_.
