

Fill in the names of the parts of a plant.

Every part of the plant has a specific function. Can you match them?

- |        |   |
|--------|---|
| roots  | collect the sunlight to convert carbon dioxide and water into food            |
| stem   | anchor the plant into the ground and absorb water and nutrients from the soil |
| leaves | transports water and nutrients upwards  |

Fill in missing words using words from the box:

For a plant to \_\_\_\_\_ well, it needs the right \_\_\_\_\_ of water, \_\_\_\_\_, nutrients from the \_\_\_\_\_, air and room to grow.

light    grow    soil    amount

Tick the right form of seed dispersal for each plant:

	<input type="checkbox"/> wind dispersal <input type="checkbox"/> animal dispersal <input type="checkbox"/> dropping
	<input type="checkbox"/> wind dispersal <input type="checkbox"/> animal dispersal <input type="checkbox"/> dropping

The flower has **two** functions – what are they?
