WORKSHEET

Date: 14/06/2025 FFs5 – Unit 1	Teacher's feedbacks

Task 1. Choose the correct material for each picture.

1) 

wool **rubber** **wood** **ceramic**

2) 

glass **plastic** **fabric** **concrete**

3) 

metal **fabric** **card** **silver**

4) 

metal **wood** **leather** **ceramic**

5) 

concrete **rubber** **wool** **wood**

6) 

rubber **glass** **gold** **metal**

7) 

plastic **fabric** **gold** **ceramic**

LIVEWORKSHEETS

Task 2. Write full sentences using the words given. Use the correct structure.

1. Linda / be / good at / draw.

→ ***Linda is good at drawing.***

2. It / take / me / 20 minutes / walk to school.

→ _____

3. My brother / be / bad at / cook.

→ _____

→ _____

9. Peter / be / good at / play football.

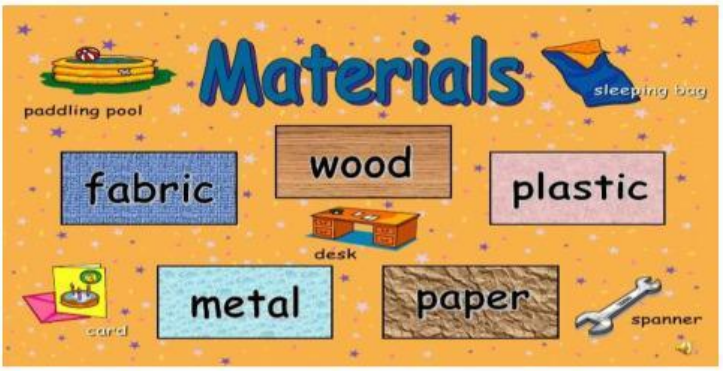

→ _____

10. It / take / my dad / 1 hour / fix the bike.

→ _____

Task 3. Read the text and answer the questions.

Materials Around Us

Every object around us is made from a certain material. These materials are chosen based on their properties and how they will be used. For example, wood is strong and easy to cut, so it is commonly used for making furniture like tables and chairs. Glass is clear and breakable, so it is ideal for windows or bottles. Metal is hard and durable, so it is used in machines, tools, and buildings.

Plastic is a modern material. It is light, waterproof, and can be shaped into many forms. That's why it's used in making toys, containers, and even car parts. Fabric materials like cotton and wool are soft and comfortable, so people use them to make clothes, curtains, and blankets.

Each material has advantages and disadvantages. Glass is clear but can break easily. Metal is strong but heavy. Plastic is flexible but may harm the environment if not recycled properly. Choosing the right material depends on the purpose and the situation.

Choose the best answer (A, B, C, or D):

1. Why is wood often used for making furniture?
   A. It is heavy and shiny
   B. It is soft and flexible
   C. It is strong and easy to cut
   D. It is waterproof

2. Which material is described as modern and light?

A. Metal

B. Plastic

C. Fabric

D. Wood

3. Why is glass used for windows?

A. It is strong

B. It is waterproof

C. It is colorful

D. It is clear

4. What is one problem with plastic?

A. It is too heavy

B. It is very expensive

C. It is not comfortable

D. It can harm the environment

5. Which material is used for clothes?

A. Ceramic

B. Metal

C. Fabric

D. Glass
