Dividing, 2-Digit Quotients

The Girl Scouts have to carry 52 pieces of kindling to their campsite. How many pieces of kindling will each scout have to carry?

We are looking for the number of pieces of kindling each scout will carry. Altogether, there are ____ pieces of kindling to be carried.

There are ____ scouts.

To find the number of pieces of kindling each scout will carry, we divide ____ by ____.

Divide the 5 tens by 4.

$$4\overline{)52}\quad 1$$
$$4$$
$$1$$

Divide. $4\overline{)5}\quad 1$
Multiply. $4 \times 1 = 4$
Subtract. $5 - 4 = 1$
Compare. $1 < 4$

Regroup the 1 ten for 10 ones.

$$4\overline{)52}\quad 1$$
$$4\downarrow$$
$$12$$

Bring down the ones digit. There are now 12 ones.

Divide the 12 ones by 4.

$$4\overline{)52}\quad 13$$
$$4$$
$$12$$
$$12$$
$$0$$

Divide. $4\overline{)12}\quad 3$
Multiply. $4 \times 3 = 12$
Subtract. $12 - 12 = 0$

Each scout must carry ____ pieces of kindling.

Getting Started

Divide. Show your work.

1. $3\overline{)42}$
2. $4\overline{)92}$

Copy and divide.

3. $50 \div 5$
4. $96 \div 8$

1. $5\overline{)75}$	2. $3\overline{)63}$	3. $4\overline{)80}$	4. $4\overline{)96}$	5. $2\overline{)56}$
6. $3\overline{)72}$	7. $7\overline{)84}$	8. $5\overline{)80}$	9. $6\overline{)96}$	10. $9\overline{)90}$
11. $8\overline{)88}$	12. $3\overline{)81}$	13. $4\overline{)56}$	14. $7\overline{)91}$	15. $6\overline{)84}$
16. $2\overline{)94}$	17. $3\overline{)75}$	18. $7\overline{)98}$	19. $3\overline{)90}$	20. $4\overline{)76}$

Copy and divide.

21. $78 \div 6$	22. $90 \div 2$	23. $85 \div 5$	24. $72 \div 6$
25. $60 \div 5$	26. $60 \div 2$	27. $72 \div 4$	28. $88 \div 4$
29. $66 \div 3$	30. $76 \div 2$	31. $87 \div 3$	32. $96 \div 8$

Problem Solving

Solve each problem.

33. Gene bought 3 thank-you notes for 75¢. How much did each note cost?

34. Rhoda feeds her horse 3 apples a day for lunch. How many apples will the horse eat in 27 days?

35. Lemons cost 8¢ each. Sally has 96¢. How many lemons can Sally buy?

36. The tennis club used 45 tennis balls in a tournament. Tennis balls are sold 3 in a can. How many cans of tennis balls did the club use?
