

Comic Legend Stan Lee Dies at 95

Stan Lee, the writer and co-creator of Marvel Comics and its

legendary characters, including Spider-Man, Iron Man, and the X-Men, died on

November 12 at the age of 95. In the early '60s, inspired by the movement, Lee's

job was to create humanized superheroes that could compete against the Justice League

of DC Comics (e.g., Superman, Wonder Woman, and Batman). When Marvel began

making blockbuster films, Stan Lee became a household name. In years, fans

have enjoyed looking for Lee in his cameo roles in Marvel films and TV series.

Lee's wife of 69 years, who did voice-over work in some of Marvel's films, died

last year at the age of 95.
