THE HISTORY OF TV

SELECT THE CORRECT ANSWER ACCORDING WITH THE READING
(SELECCIONA LA RESPUESTA CORRECTA DE ACUERDO A LA LECTURA).

HISTORY OF TV

Charles Jenkins invented a mechanical television that he called "radiovision," which was said to have transmitted one of the first moving images in 1923. This American inventor went on to promote his theories in the technology of the television along with other inventors when they transmitted the first live pictures onto a screen.

First Commercial Televisions

People were very curious and excited about televisions coming to the public. However, some feared the new technology, thinking that televisions could transmit personal conversations onto the TV. The 1928 Baird model mechanical television sets were introduced to the public at the "Olympia" Radio Exhibition in 1929.

These mechanical TV sets projected orange-red blurry images on a screen about the size of a dollar coin. The first televisions sold for about fifty-five dollars, which only people of wealth could afford. Electronic televisions were introduced to the United States at the 1939 World's Fair. The first electronic television set was the 1938 DuMont Model 180 and cost around one hundred twenty-five dollars.

1. INVENTED A MECHANICAL TELEVISION.

JAMES DAWSON

CHARLES JENKIS

JHON DELL

2. THE FIRST MOVING IMAGES WAS TRANSMITED IN.....

1923

1983

1973

3. THESE MECHANICAL TV SETS PROJECT.....BLURRY IMAGES

BLUE -RED

BLACK -WHITE

ORANGE-RED

4. THE FIRST TELEVISIONS SOLD FOR ABOUT DOLLARS.

FIFTY-FIVE

FIFTY-FOUR

FIFTY-THREE
