

 Reading Comprehension: The Eruption of La Palma Volcano (2º ESO)

In September 2021, the volcano **Cumbre Vieja**, located on **La Palma** in the Canary Islands, erupted after 50 years of being inactive. The eruption lasted for **85 days**, making it the **longest** eruption ever recorded on the island. The lava destroyed **thousands of buildings** and **roads**, and over **7,000 people** had to evacuate their homes. The ash affected the air quality and flights were cancelled.

Many scientists studied the eruption to understand how volcanoes behave. Today, the island is recovering slowly, and people are rebuilding their lives.
