Example Supporting Arguments

AGREE

- **Supporting Argument:** My first argument is that social media sites allow children to make many friends easily.
- **Supporting Example:** For instance, children can use these sites to make friends who live in different cities, states, or even countries. This can be very helpful for kids who do not have many friends in their normal lives.

DISAGREE

- **Supporting Argument:** My first argument is that social media sites can make kids waste too much time.
- **Supporting Example:** For instance, over 80 percent of teenagers check their phones every hour. In many cases, these teens are checking social media sites. Instead, it would be better for teens to do other activities, such as studying or hanging out with their friends offline.
