3. The man doesn't always want to go to Egypt.
4. The woman went to Egypt last summer
5. The man doesn't want to go with the woman.

II. READING

Reading 1

Understanding Illness and Recovery

When people fall sick, it is often due to infections caused by viruses or bacteria. Common illnesses such as the flu, colds, or stomach bugs can spread easily through coughing, sneezing, or touching contaminated surfaces. To prevent the spread of illness, doctors advise people to wash their hands regularly, avoid close contact with sick individuals, and maintain a healthy lifestyle.

Recovery from illness depends on the type and severity of the disease. For mild illnesses like the common cold, rest, staying hydrated, and eating nutritious food are usually enough. However, more serious infections may require medication such as antibiotics or antiviral drugs. During recovery, it is important to listen to your body. Resting allows the immune system to fight off the infection more effectively. Drinking water helps flush out toxins, and a balanced diet gives the body the energy and nutrients it needs to heal.

In some cases, people may need to take additional steps for full recovery. For example, after a surgery or a serious illness, physical therapy might be necessary to help the body regain strength. Mental health is also important during recovery. Stress and anxiety can slow down healing, so staying positive and getting emotional support from family or friends can help. Ultimately, the key to recovery is patience and

proper care. People should not rush back to work or school before they are completely well. Taking time to fully recover ensures better long-term health and prevents relapses.

Read the text carefully. Based on the text, choose true if you think the statement is true. Choose false if you think the statement is false

1. The flu and the common cold are usually caused by bacteria.
2. Washing your hands regularly can help prevent illness.
3. Serious infections can sometimes require antibiotics or antiviral drugs.
4. Drinking sugary drinks helps speed up the recovery process.
5. Mental health has no impact on physical recovery.
6. Eating nutritious food is important when recovering from an illness.
7. People should return to work or school as soon as they feel a little better.
8. Physical therapy may be needed after surgery.
9. The immune system becomes weaker during recovery.
10. Emotional support from family and friends can help the healing process.

Reading 2

Read the text carefully. Based on the text, choose the correct answer from the four options!
