

## Chapter 11: Calculation Rules

### Year 5

#### Worksheet A: Use the Laws of Arithmetic to Simplify Calculations

1. Use the commutative law of addition to help you add.

(a)  $75 + 43 + 25 = 75 + 25 + 43$   
 $= 100 + 43$   
 $= \underline{\hspace{2cm}}$

Swap the positions of 43 and 25.  
 $75 + 25 = 100$   
It is easier to add 100 and 43.

(b)  $45 + 67 + 55 = 45 + \underline{\hspace{2cm}} + 67$   
 $= \underline{\hspace{2cm}} + 67$   
 $= \underline{\hspace{2cm}}$

(c)  $185 + 127 + 15 = 185 + \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$   
 $= \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$   
 $= \underline{\hspace{2cm}}$

Swap the order of  
the numbers to  
make 200.

2. Use the associative law of addition to help you add.

(a)  $149 + 150 + 150 = 149 + \underline{\hspace{2cm}}$   
 $= \underline{\hspace{2cm}}$

The associative law says that  
you can add 150 and 150 first.  
It is easier to add 149 and 300.

(b)  $288 + 140 + 160 = 288 + \underline{\hspace{2cm}}$   
 $= \underline{\hspace{2cm}}$

(c)  $199 + 185 + 15 = \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$   
 $= \underline{\hspace{2cm}}$

3. Use the commutative law or associative law to help you add.

(a)  $192 + 120 + 80$

(b)  $285 + 270 + 15$
