## Photosynthesis & Soil Review

Select a word from the word box and type it into the correct sentence space below.

### Word Box:

Organic, water ( $H_2O$ ), five, carbon dioxide ( $CO_2$ ), bedrock, light

Photosynthesis is a process where plants use \_\_\_\_\_ Vitamin D from the sun. Then the plant takes \_\_\_\_\_ through its leaves from the air and \_\_\_\_\_ from the soil.

There are \_\_\_\_\_ layers of soil. The \_\_\_\_\_ is the name of rocks which resembles large bolder like pieces. The \_\_\_\_\_ layer shows the minerals and richness of the decaying of plant life and death and living animal life.
