- 5 If they don't know a word, they can look it _____ in a dictionary.

PRONUNCIATION

7 Match the words with the same sound.

questionnaire Argentina Swedish relationship
energetic watch

- 1 apologize Argentina _____
- 2 **China** _____ _____
- 3 information _____ _____

8 Underline the stressed syllable.

Example: athletics

- 1 cus|to|mer
- 2 tech|no|lo|gy
- 3 re|la|tion|ship
- 4 in|ven|tion
- 5 wind|sur|fing

READING

1 Read the article and check (✓) A, B, or C.

Inventions in sports

This week in Inventor's World, we speak to three professional athletes about how modern inventions have changed their sport.

Luke Gautier, road cyclist

Professional cycling is a very inventive sport. Riders and cycling teams are always happy to try out new types of bicycles, helmets, biking clothes – anything to try to save one second in the race. In my opinion, the biggest change in recent years is what the bikes are made of. Thanks to a technology called carbon nanotubes, racing bikes are stronger and lighter than ever before. Carbon nanotubes were invented by the computer company IBM, but so far no one has used them inside computers. In 1996, the Swiss company BMC made the first "carbon fiber" racing bike – it won the Tour de France that year. Carbon nanotubes are also used in tennis rackets and in the screens of phones.

Edgar van Marl, swimmer

Sometimes a new invention can be controversial. In my sport, a new type of swimsuit caused problems a few years ago. The company involved, Speedo, has made swimsuits for over one hundred years. They are so famous that, in some countries, a racing swimsuit is simply called "a speedo." In 2008 they made a new suit that was inspired by sharkskin. Called the "LZR racer," the suits were designed with long arms and legs to help swimmers cut through the water like a fast shark. The suit was first sold in March 2008. By November

2008, swimmers wearing the suit had broken 74 world records. That's incredible! When Michael Phelps wore the suit at the Olympics in Beijing, he won eight gold medals and said, "I feel like a rocket." Swimmers loved them, but the judges didn't. The suits were banned and there are now many more rules about what suits are made of.

Suki Tyler, tennis

The use of video technology has really changed my sport. The most common system was invented in 1999 by an English company. It was developed especially for sports on television. It's called Hawk-Eye – a "hawk" is a type of hunting bird that has very good eyesight. The video can show very clearly if a ball has or hasn't gone over a particular line. Hawk-Eye was used almost immediately to help with decisions in cricket – in 2001 it was used for the first time in a match between England and Pakistan. It was soon used in tennis too. The audience loves the excitement that the technology brings to matches. For me, it's a positive thing. Sometimes it's part of the strategy I use. For example, even when I know that the referee made the right call, I can ask for Hawk-Eye just because I know it's going to make my opponent wait. It's going to make her really annoyed!

Example: In his job, Luke ____.

A designs bicycles B fixes bicycles C races bicycles

1 Carbon nanotubes were invented by ____.

A CNT B BMC C IBM

2 Professional bikers will try anything if it makes them ____.

A faster B lighter C more popular

3 A ____ company first used carbon nanotubes in bicycles.

A French B American C Swiss

4 Speedo is a ____ company.

A well-known B controversial C new

5 At the Beijing Olympics, eight gold medals were won ____.

A in the new suits B by Michael Phelps C in world record time
