

When I was in college...

Read the story of Ozzy Vedder, an engineer from Chicago, when he was a student, in the 90's. Then rewrite his story. Use was/were. Do not use contractions.

I am a student at UTEC. Algebra is my favorite subject. Classes are interesting, and the professors are very patient. We are all engaged, and the atmosphere is positive. Learning is fun, and the challenges are satisfying. I am happy with my progress, and my grades are better year after year. This is a great experience!
