

## THE SACK GARDEN

This is Meg. Meg lives in South Africa. She has three kids. It is hard to feed her kids. White people own most of the farmland in South Africa. Meg does not have land for a garden. Food costs a lot of money.

But Meg has a very good way to grow food. She finds a big sack. She puts rocks in the middle of the sack. She fills the rest of the sack with dirt. She makes little holes in the side of the sack. She puts a tomato plant in one hole. She puts a bean plant in one hole. She puts a green pepper plant in one hole. She puts eggplant in the top of the sack. She waters the sack garden from the top.

Her garden does not need much water. Her garden does not need much room. Her garden does not cost much money to make. Her garden does not have many weeds.

Now Meg can feed her kids.
