

What a tail! Hey, look... The book says Bekantan is a Proboscis monkey.

Bekantan is a type of primate. Its common name is Proboscis monkey. It means a long-nosed monkey. Its scientific name is Nasalis larvatus.

Pardon?
What monkey?

Proboscis monkey.
It means a long-nosed monkey.

Hmm... an interesting name but hard to say.

It also has another name. *Nasalis larvatus*.

Wait... I should take notes.
Bekantan is a type of primate. Its common name is pro...

Right, thanks.
Proboscis monkey. And its scientific name is *Nasalis larvatus*.

Proboscis monkey.

NOTE

Bekantan is a type of primate. Its common name is PRO -
