For each question, choose the correct answer.

Star makes Simon's restaurant the best in town

One, two or even three Michelin stars are given to restaurants with exceptionally good food, and chef Simon Jones has just won one for his restaurant, The Tiger. It is the first time that a restaurant in Moreton has got a Michelin star and Simon is delighted. He is very proud of it, and he is having a party for friends, family and customers. 'I'm so pleased with the star,' Simon says. 'It shows how much we have improved in the past ten years since we started the business.'

Michelin stars are not easy to win and Simon hopes it will help his business. The Tiger is a fish and seafood restaurant, which makes the star even more special. The restaurant is over 80 kilometres from the sea, so the fish and seafood have to travel a long way by train every day.

Simon's wife, Angela, has been at the restaurant since its beginning. She and Simon met when she got a job doing the washing-up. Five years ago, she left the kitchen and now she takes bookings and shows customers to their tables.

'It's great news, and not only for us!' Angela says. 'Hopefully, the Michelin star will bring a lot of new visitors into the area. If our business grows, there will be more jobs in the town for local people and they won't have to leave to find work.'

Simon and Angela play an active part in local life, visiting schools to share their business experience and offering work experience to school children.

Questions 14–18

For each question, choose the correct answer.

Too much plastic

by Paula Jones

Plastic is everywhere: in our streets, in the countryside, in rivers, in seas and in oceans. In the UK, over 13 billion plastic bottles are used every year. The good news is that more and more people are recycling plastic and there are also some clever ways to use it.

Roads are usually made of asphalt, but in some countries like the USA and the UK, engineers have started to use plastic to make new roads. First, they collect the plastic, wash it and dry it. Then they cut it into small pieces and heat it to about 170°C. After that, they mix it with hot asphalt and use it to make the road surface. This way of making roads is more difficult than the usual way, but the plastic and asphalt mixture is harder and better than asphalt only.

How about wearing a pair of trainers made from recycled plastic bottles? Some well-known sports companies use six to eleven plastic bottles to make one pair of trainers. This means that fewer plastic bottles are thrown away, and they end up on people's feet, not in the ocean!

Plastic can be recycled in other clever ways too. It is used to make rubbish bins, toys, tables and chairs, sleeping bags, backpacks and hundreds of other things. One clothes company cuts it into very small pieces to make clothes. Believe it or not, the England women's national football team wears a kit made from recycled bottles!

- 14** What is happening in the UK that is good news?
