

# DESERTIFICATION

The \_\_\_\_\_ it's the slow \_\_\_\_\_  
of a fertile \_\_\_\_\_ into a \_\_\_\_\_.

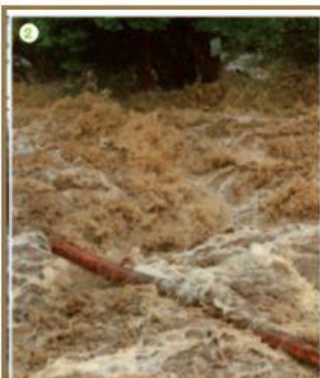

It usually happens as a consequence of \_\_\_\_\_  
because of wind and water \_\_\_\_\_.

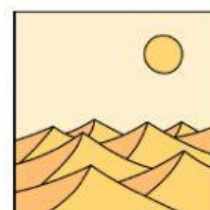

Match (with lines) the pictures with the descriptions.

The soil is not  
fertile anymore.  
Now it's a desert.

Plants and trees  
disappear because  
of a fire, farming or  
cutting down trees.

The soil is  
unprotected.  
Water and wind  
erode the land.

Watch the video about desertification.

Then, number the sentences in the correct order.

- \_\_\_\_\_ The area is now a desert.
- \_\_\_\_\_ A fertile rainforest.
- \_\_\_\_\_ The soil is unprotected and the wind erodes the land.
- \_\_\_\_\_ A fire starts and destroys the plants and trees.
- \_\_\_\_\_ The soil is not fertile anymore.
- \_\_\_\_\_ The rain extinguishes the fire, but erodes the land.

Types of desertification. Choose the correct option for each picture.
