

Calculating Equation of a Straight Line

What is the equation of a straight line?

$m =$

$c =$

A straight line crosses the y-axis where $x =$

<i>x</i>	-1	0	1	2	3
<i>y</i>	-5	-1	3	7	11

gradient =

y intercept =

equation of the line

x	-2	0	2	4
y	3	1	-1	-3

gradient =

y intercept =

equation of the line

<i>x</i>	2	3	4	5	6
<i>y</i>	8	5	2	-1	-4

As x increases by 1, y decreases by

As x decreases by 1 y increases by

When $x = 1$, $y =$

When $x = 0$, $y =$

gradient =

y intercept =

equation of the line

x	-2	-3	-4	-5	-6	-7
y	-3	-5	-7	-9	-11	-13

As x decreases by 1, y decreases by

As x increases by 1, y increases by

When $x = 1$, $y =$

When $x = 0$, $y =$

gradient =

y intercept =

equation of the line
