

OUR AMAZING BODY

The human body is an incredible machine made of many parts that work together. Our **face** has the eyes, ears, nose, and mouth. The **eyes** help us see, the **ears** let us hear, the **nose** allows us to smell, and the **mouth** helps us eat and speak.

Our **arms** and **hands** are used to lift, carry, and touch things. The **legs** and **feet** help us walk, run, and jump. Inside our body, we have important **organs**. The **heart** pumps blood, the **lungs** help us breathe, and the **stomach** digests our food. Every part of our body is important, and they all work together to keep us healthy.
