3 There won't be ice rinks. _____
4 Motorbikes won't have wings. _____
5 Planes will look like submarines. _____
6 Robots will drive trams. _____

10

4 Read and circle.

My teacher is a robot

What do you think? Will robots teach children in the future? It's possible. In South Korea scientists are working on a robot to teach English to their students.
They want to create a robot that looks like a person. The robot's face changes when it's angry, happy or tired. It will have arms and it will write on the board. It will speak and help students with their pronunciation.
The scientists created an example of this robot teacher. It's got bright colours and it looks more like a penguin than a person. Scientists say that students will listen to their robot teacher in class and will like it because it looks like a toy.

1 South Korean scientists are making a robot for **British** / **South Korean** students.
2 The robot will have **different expressions** / **the same face**.
3 It **will** / **won't** do things a teacher does.
4 Students will learn to **write** / **speak** better with the robot.
5 The example robot doesn't look like **a person** / **an animal**.
6 Students **will** / **won't** get bored with the robot teacher.

_____

6 travel / in the future? / Will / by / bus / we
_____

10

6 Read. Then write your own answer. Write 40–60 words.

What's your favourite place in your town? Explain why.

My favourite place in my town is the library. I go there every weekend with my mum and my sister. Sometimes I go after school with friends and sometimes I go on my own. I like looking at the books and reading the first page. I also love looking at the pictures. It's a nice, quiet place.
