Tentukan struktur tiap paragraf

Nikola Tesla was born on July 1o, 1856, in Smiljan. This place is now in Croatia. When he was young, he liked science very much. He went to school in Austria to learn about electricity.

Later, Tesla went to America and worked with Thomas Edison. But they did not agree about electricity. Edison wanted to use one type of electricity, but Tesla wanted to use a different type. Tesla's type of electricity is the one we use today.

Tesla made many things in his life. He made a special machine called the Tesla coil. He also worked on ways to send electricity and radio signals without wires. In 1891, he became an American citizen and worked in New York.

He wanted to give free electricity to all people in the world. But rich people did not want to give him money for his ideas. When he died in 1943, he was alone and had no money.

Tesla had many good ideas that people did not understand at that time. People did not think he was special when he was alive. But now, everyone knows he was one of the best inventors ever.
