

## My Autobiography

Hello! My name is Daniel Rodríguez. I was born on September 5th, 1990, in Bogotá, Colombia. I am 34 years old now, but I want to tell you about my life in the past.

When I was a child, I lived in a small house with my parents and my two sisters. We didn't have much money, but we were very happy. I went to a public school near my house. I usually walked to school with my sisters. My favorite subject was history, but I didn't like mathematics because it was very difficult for me.

When I was 10 years old, I played football every afternoon with my friends. We played in the street until it was dark. I also watched cartoons on TV, and I loved eating ice cream with my family on Sundays.

When I was a teenager, life changed a little. I studied more at school because I wanted to go to university. I listened to music every day, and I often went out with my friends on the weekends. We usually went to the cinema or walked in the park. I also started playing the guitar, and I practiced a lot at home.

After high school, I studied engineering at the university. It was difficult at first, but I worked hard. I met many new friends there, and I learned many things. At that time, I also had my first job in a small shop. I didn't earn much money, but I was very proud because it was my first experience.

When I finished university, I got a job in a company, and later I got married. Two years ago, my wife and I moved to a new apartment. Last year, we had a baby boy. His name is Samuel, and he changed our lives completely.

Now I work as an engineer, and I study English because I want to travel more in the future. I remember my past with love, and I hope my future will be full of good experiences.

This is my life story!

## Comprehension Questions
